SEPTEMBER DEADLINE

Digitoll is Norway's new digital system for customs clearance.

Instead of handling paperwork upon arrival, all transport and cargo data must now be submitted digitally in advance. For transport companies, the biggest change isn't the software—it's operational.

To avoid delays, the right information must be collected earlier, from the right party, in the exact right format.

ODIN SERVICES

- ✓ 1:1 Digitoll Onboarding
- ✓ Consultancy
- ✓ Digitoll Platform
- ✓ Customs Brokerage

ODIN CUSTOMS Digitoll Platform

- For carriers who need full control
- 100% Digitoll compliant, tested with Tolletaten
- Can be integrated with your own system
- Allow external freight forwarders to collaborate on your shipment
- Share links to drivers or customers

The screenshot shows the Odin Customs dashboard. The left sidebar contains navigation options: Dashboard, Company, DATABASE, Companies, and Drivers. The main area is titled 'Transports' and includes a search bar, a table of transport records, and a '+ New Transport' button. The table has columns for Mode, Title, Status, MRN, HCS, Carrier, Identifier, Border, ETA, and Access. The user profile 'Novura' is visible at the bottom left.

MODE	TITLE	STATUS	MRN	HCS	CARRIER	IDENTIFIER	BORDER	ETA	ACCESS

HOW TO PREPARE

If you regularly import goods into Norway, or if you are a carrier or partner involved in these movements, now is the right time to review your process.

Do NOT wait until the deadline to discover that critical information is missing!

CHECKLIST

- ✓ Identify who in your supply chain holds the required Digitoll transport data.
- ✓ Collect all shipment data and documents before the truck departs
- ✓ Set up a standard process for sending documents to Odin Customs.
- ✓ Contact Odin Customs today to review your workflow before the deadline hits.
